Me too. A real eBay message would have your individual eBay id in the Subject header. No individual eBay id, the message gets chunked unread. Besides, eBay only sends out promotional emails, not emails detailing problems with your account.

Ed,
VA3ES

Content-Type: text/plain; charset=us-ascii
Content-Transfer-Encoding: 7bit

I recently obtained an interesting bit of ephemera, Form 770 of the Bureau of Navigation dated 1929 advising one Chester A. Lamont of Astoria, OR to appear for an examination for a radio license. He is admonished to "Bring your headphones with you to the examination room" by Edwin W. Lovejoy, Supervisor of Radio.

So far so good. But at the bottom of the form the various grades of radio license are listed. Under Commercial there is First class and Second class. But under

Amateur there is First grade and Cargo grade. Cargo grade!? That's new to me.
Can anyone expand on the cargo grade amateur license?

I wonder if anyone might have info on the coil and wire sizes on a
Millen 90651 GDM.

Bought one without the coils, couldn't pass it up. It might be a while
before a Junker shows up ... Thanks tom N3LLL

The other day I lost a bid on a rather attractive Rhode and Swartz item on EBay. A couple of days later, maybe a week, I received an email with the address of the original seller stating that the original buyer had not come through with the cash and would I like to purchase the item on a "second chance auction", and if so wait for the offering from EBay.

I received an additional email, this is when I started to think things were fishy, that the fellow was in the UK on a family emergency but his spouse in Colorado, where the original was located, would ship the Item.

A day later I received an "official" looking EBay correspondence stating that I could purchase the item as a second chance item but I could not pay with PayPal in the UK, as it was not supported there. Instead of PayPal I was instructed to use Western Union.

Interesting scam, once the Western Union Money received, the thief picks it up and goes along his merry way! The original seller none the wiser.

The scam plays on the emotion of having a second chance to win what one thinks he has lost, pretty clever ... Tom, N3LLL

MIME-Version: 1.0
Content-Type: text/plain;
 charset="iso-8859-1"
Content-Transfer-Encoding: 7bit

I bought a set of coils, handwritten note specs say 1440-2920, 2.8-6.25, 6.05-13, 12.25-26.2, 25.2-53.5, 52-113, 112-230. These look like almost not-commercial quality but almost too good to be homebrew. Like somewhere in between. The coils and bases are clear plastics. The coil form is glued to a little rectangular base

of same material - glued, not single cast piece - and there are two banana pins. So the dipmeter must have had a two-section (CT) capacitor, or else it was a tunnel diode or other 2-terminal oscillator. Anyone have an idea if these are from some commercial set? The top coil has a near hairpin loop that looks too neatly executed to be quite homemade. Maybe some small company ????

Tnx, -Hue Miller

If you bid on any large item you are almost guaranteed to get on a mailing list where you get phish emails all the time. I get about a half-dozen phish-mails a day.

Banks, eBay, and everyone else never ask for account updates in emails.

Anytime I bid on a big item, I always get two or three second chance offers. Sometimes even when I won.

> Can someone point me to "F"connector suppliers?
> I have searched Mauser & others to no avail.

Home Depot now carries high quality "F" compression connectors manufactured by PPC and sold under the Ideal Industries label. The only drawback, is that these connectors require a special compression tool to properly seat the connector. Seating, rather than crimping is used. These are the same connectors now used by all the major cable MSOs. When I was Director of Engineering for AT&T Broadband, we used these connectors as well as the Augat/LRC brands. They're the "real deal."

On the other hand, if you don't need a compression connector, Home Depot sells standard PPC "F" connectors that only require a standard crimping tool. These are also sold under the Ideal Industries label.

Avoid Lowes as their cable TV hardware is generally all "brand X" from China.

John and Tom

I've gotten some hilarious automatic scams. Usually if I bid on home brew or hand made items. I need to put up a phoney auction for the Holy Grail or something just to see if an auto-scammer would send me an email like -

"I noticed you did not win auction #1234567. Please email me, I also have Genuine Ark of The Covenant - World Treasure The True Holy Grail. Boxed and in stock Brand new at best price. Deep discount if you buy a dozen or more. Also stock newest CD and DVD titles...blahblahblah"

Those scam emails are more funny than annoying to me. I keep expecting these guys to say "Special deal for you GI, 2 for dollar... etc"

heehee

But as far as special offers *from the sellers* I've often had the seller suggest I buy another item for half price and no pay any extra shipping. A while back it got me a second dynamotor that I was looking for. Second offer, extra items from the guy I bought it from I always take advantage of. It's a rare thing, but it does happen. :-)

HISTORIC MORSE CODE RADIO STATION
RETURNS TO THE AIR

Former RCA Station KPH Celebrates Its 100th Anniversary

COAST STATION KSM WILL MAKE ITS INAGURAL TRANSMISSION

COAST STATIONS WLO, KLB, NMC AND NOJ TO BE ON THE AIR

In the sixth annual event that has become known as the "Night of Nights", historic Morse code radio station KPH will return to the air in commemoration of the last commercial Morse message sent in the United States.

This year's Night of Nights is special: it's the 100th anniversary of KPH, KSM will appear on the air for the first time and four other US coast stations will be on the air, several of them on MF in addition to HF.

Frequencies and reception report information for all stations appear below.

KPH, the ex-RCA coast station located north of San Francisco, will return to the air for commemorative broadcasts on 12 July at 1701 PDT (13 July at 0001 GMT), 6 years and one minute after the last commercial Morse transmission in the US. These on-the-air events are intended to honor the men and women who followed the radiotelegraph trade on ships and at coast stations around the world and made it one of honor and skill.

Transmissions are expected to continue until at least midnight PDT (0700GMT).

Veteran Morse operators, including former KPH staff members, will be on duty at the receiving station at Point Reyes, CA listening for calls from ships and sending messages just as they did for so many years before Morse operations were shut down.

The transmitters are located 18 miles south of Point Reyes in Bolinas, CA at the transmitting station established in 1913 by the American Marconi Co. The original KPH transmitters, receivers and antennas will be used to activate frequencies in all the commercial maritime HF bands and on MF as well.

Many of the KPH transmitters will be 50s vintage RCA sets. KSM will use a 1940s vintage Press Wireless PW-15 transmitter on 12Mc. Power output will be 4 to 5kW. The transmitting antennas include a Marconi T for MF, double extended Zepps for 4, 6 and 8Mc and H over 2s for 12, 16 and 22Mc.

KPH will send traffic lists, weather and press broadcasts as well as special commemorative messages, many of which will be sent by hand. At other times the KPH and KSM "wheel" will be sent to mark the transmitting frequencies.

Members of the public are invited to visit the receiving station for

this event. The station will be open to visitors beginning at 1500PDT (3:00pm). The station is located at 17400 Sir Francis Drake Boulevard and is on the route to the Point Reyes lighthouse. Watch for a cypress lined driveway on the right about a mile past the entry to Coast Guard station NMC.

KPH is operated by the Maritime Radio Historical Society in cooperation with the Point Reyes National Seashore, part of the National Park Service.

Further information may be found on the Maritime Radio Historical Society Web site at <http://www.radiomarine.org> or by contacting Richard Dillman at +1 415-990-7090 (email: rd@radiomarine.org) or Tom Horsfall at +1 510-237-9535 (email: wa6ope@hotmail.com).

BT

Station Information follows...

KPH

KPH will transmit on 4247.0, 6477.5, 8642.0, 12808.5, 17016.8 and 22477.5kc on HF and 500 and 426kc on MF.

These frequencies have been made available through the generous cooperation of Globe Wireless, the current owner of the KPH and KFS licenses.

KPH operators will listen for calls from ships on ITU Channel 3 in all bands. The Channel 3 frequencies are 4184.0, 6276.0, 8368.0, 12552.0, 16736.0 and 22280.5kc on HF and 500kc on MF.

Reception reports may be sent to:
